CONTROLS AND AUTOMATION FOR FACILITIES MANAGERS:: APPLICATIONS ENGINEERING (HARDBACK)

Taylor Francis Inc, United States, 1998. Hardback. Book Condition: New. 272 x 216 mm. Language: English . Brand New Book. Building owners and managers expect fully automated and energy efficient operations, on line diagnostic of systems parameters to prevent failures, and on line diagnostic of problems prior to exposing occupants to deteriorating environmental conditions. A simple HVAC control is no longer acceptable by current standards. Controls and Automation for Facilities Managers examines principles and applications of HVAC engineering, outlining information for design, development of operations, logic, systems diagnostics, and building of environmental conditions with reliability and minimum operating cost. The book moves from the principles of mechanical engineering (related to HVAC systems) through DDC applications engineering, thereby summarizing complex topics of electrical engineering for mechanical engineers. Individual chapters: * Provide essential information on related mechanical (HVAC) engineering, controls strategies, and examples of basic algorithms for on line diagnostics * Guide (DDC) application engineers to a more thorough understanding of mechanical engineering disciplines (i.e., the psychrometric chart) as well as guide mechanical engineers to a more thorough understanding of DDC applications engineering (i. e., direct digital controllers and systems) * Outline information on current topics Discussions also include: * Indoor air quality - presenting material for facilities engineers as well as controls and consulting engineers * Utilities metering - describing the distribution of real time data over a network, including consumption, alarms, diagnostics, trends, and reports * On line problem diagnostics - outlining HVAC and environmental problems Controls and Automation for Facilities Managers serves as an exceptional guide for facilities managers and engineers, architects and consulting engineers, vendors and contractors, and other professionals in the design, application, and implementation of controls and automation systems for industrial, educational, institutional, and governmental facilities. This reference will enhance design, systems implementation, systems operation, and...
